

I claim:

- 5 **1.** Mirror equipment, comprising:
a mirror;
features disposed behind the mirrored surface for gathering water;
structures disposed behind the mirrored surface for retaining water;
Wherein the water gathering features are several and are adjacent to the major
10 portion of the vertical surface area of the back of the mirror.
- 2.** Mirror equipment as claimed in Claim 1;
wherein the water retaining structures are several and extend outward from adjacent
the back of the vertical mirrored surface such that water retaining structures are
formed which structures cover the major portion of the rear of the mirror.
- 15 **3.** Mirror equipment, comprising;
a mirror;
Wherein a vertical surface of the mirror is utilized to admit water into water retaining
structures.
- 4.** Mirror equipment as claimed in Claim 3, wherein the water retaining structures
20 are comprised of material of cellular structure disposed behind the mirrored surface.
- 5.** Mirror equipment as claimed in Claim 3, wherein the water retaining structures
are holes or cavities.
